

Unlimited Liability present

HafenCityProject

On September 11th 2008, at 6 pm at the Magellan Terrassen, our enterprise Insecurity® will go into HafenCity on behalf of Hamburg's unlimited liability project. Being perfectly in tune with the common-law liberalism characteristic of advanced capitalism, we offer to double this system via a commercial intimidation operation that will allow buyers to discover our products and services.

Insecurity® is a civil disobedience enterprise whose purpose is capitalist and anxiogenic. Recent market studies have confirmed the timeliness of our activities in view of the sector's business perspectives.

«The security market has never done so well: over 25% growth in the anti-terrorism sector in France last year, over 15% in biometrics, over 10% in video-surveillance, a combined growth of 7,2%.» (Le Figaro, 22/10/2007)

Exemple 1

INSECURITY

« L'environnement, qui est reconstruit toujours plus hâtivement pour le contrôle répressif et le profit, en même temps devient plus fragile et incite davantage au vandalisme. Le capitalisme à son stade spectaculaire rebâtit tout en toc et produit des incendiaires. Ainsi son décor devient partout inflammable comme un collège de France. »

Guy Debord
